This course offers an introduction to the economics of international trade, trying to make sense of globalization and the evaluation of trade policy. The text for the course is my own textbook, *International Economics: Analysis of Globalization and Policy* (Wiley), available at the bookstore. There will also be supplemental materials available on the class collab page. The pre-requisite is Econ 3010.

There will be a mid-term exam in class on Thursday, October 6 and a final exam 9:00am-12:00pm on Monday, December 12. The final grade will be based on the mid-term (30%), a series of problem sets (20%), a written assignment due on Tuesday, December 1 (20%), and the final exam (30%). ***These weights are final, so plan ahead!***

This syllabus represents more material than we will probably be able to cover in the course of the semester. Each topic below corresponds to a chapter with the same name. Of course, nothing that is not dealt with in class will appear on an exam, and the best guide to the relative importance of a topic will be how much class time was devoted to it.
